

## **The Fog**

### **Verse 1**

**Cmaj 7 b7/B11**

You fall apart and then you set yourself up right

You never want to lose in your internal fight

You try to tell yourself that, it's just a passing phase

Walking through the depths of your mental maze...

### **Chorus (2x)**

**C G Bb F**

...until you see... the fog is in your mind.

### **Solo over verse chords for 4 bars**

### **Verse 2**

You never tell me and I never want to know

Who you are today and who is running the show

You twist and turn in the mazes in your head

Can you see the way through, words left unsaid?

### **Chorus (4x) end on Em**

**Solo with bass on E and eventually band meets at the Prog Riff**

**Piano interlude that transposes to Am**

**Bridge**

**Am Amaj7+9 F7 Em**

Long ago you could see the world so clearly now, Ohhh

Long ago you could see beyond the lies, Ohhh No

Long ago you could see the fog within you now, Ohhh

Long ago you could see through the disguise

**Chorus (8x) (First 4 bars just piano) Last bar end on Em**

**Prog Riff and end.**
